# DuoFlex FAMILY

## Meet DuoFlex - a new family of smart mounting solutions designed to make mudguard installation easier, more flexible and more reliable.

Built for the demands of commercial vehicles, the DuoFlex family combines **secure mounting, adaptable design and straightforward handling** in one flexible concept. Whether the priority is fast installation, familiar assembly or maximum flexibility, there is a DuoFlex solution to match.

## ONE FLEXIBLE IDEA

- **DuoFlex**
  A flexible and easy-to-handle solution that adapts to different vehicle configurations and makes installation and maintenance quick and uncomplicated.
- **DuoFlex Hinged**
  A robust, familiar hinged design that delivers secure fixation and straightforward assembly – built for applications where reliability and ease of use matter.
- **Adapting Sleeves**
  An easy way to extend the flexibility of the DuoFlex system. The adapting sleeves allow the holders to accommodate different stay diameters while maintaining a secure fit.

**NEW**
**PATENT PENDING**

# DISCOVER THE DuoFlex FAMILY

**From flexible mounting to proven robustness, DuoFlex gives you the freedom to choose the right solution for the job.**

## DuoFlex

### Quick. Flexible. Practical.

Material: PA6 GF30
For stay dimensions ranging up to Ø50.0
Can be adjusted to other sizes using adapter sleeves

- ±70 mm adjustment for easy positioning.
- Single-bolt fastening for quick fitting and removal.
- One holder, multiple stay sizes with adapting sleeves.

---

## DuoFlex HINGED

### Proven. Robust. Familiar.

Material: PA6 GF30
For stay dimensions ranging up to Ø50.0
Can be adjusted to other sizes using adapter sleeves

- Hinged construction for secure and stable fixation.
- Familiar assembly principle for easy installation.
- ±70 mm adjustment to accommodate different configurations.

---

## ADAPTING SLEEVES

### Small addition. More possibilities.

Material: TPU
Allows the holder to adapt to multiple configurations without compromising stability or performance.

- Adapts the holder to smaller stay diameters.
- Easy insertion without additional modification.
- Secure fit while maintaining stability and performance.
